Re: Revision of Part 15 of the Commission's Rules to Permit Unlicensed
National Information Infrastructure (U-NII) Devices in the 5 GHz Band,
ET Docket No. 13-49

Comments in Support of Petition for Reconsideration of WISPA, Cambium, Mimosa Networks and JAB

Dear Ms. Dortch,

Bolt Internet is a wireless internet service provider that provides service in Yavapai County throughout central Arizona. We operate in the 5725 to 5850 band and most of our customers are very remote, and have limited options for internet service. We here at Bolt Internet are very concerned about the effects of the new rules in 15.407 that will severely limit our ability to provide current levels of service let alone expanding to allow and support faster speeds in our ever growing market place.

The changes from 15.247 to 15.407 will have many effects on rural broadband development. By increasing costs this could force some rural depressed areas out of the price point that they can afford. The increased costs will slow our growth due to available cash out lay. With the reduced frequency it will also make it harder to supply a good service to all that want it by reducing the amount of customers we can service off of one site. This will make it harder for us to reach into these new areas with increased cost yet less return on our investment.

We feel that none of the changes will fix the issue since there has been no recorded case of equipment certified under 15.247 configured to operate in the correct band ever having interfered with the 5600 to 5650 TDWR band. The problem has been a few bad apples that are doing things they should not do. Punishing a group of citizens and businesses who are providing necessary services to the public for the actions of a few devious or incompetent people is not the answer to this issue.

600 E Gurley St, Suite E, Prescott AZ 86301 (928) 717-BOLT (2658) www.BoltInternet.com

To conclude this letter we at Bolt Internet support the position of WISPA, et al that the loss of performance and the increased cost to us and the customers negates any positive effect the new rules would have. Please Reconsider this rule change and reinstate rules under 15.247

Sincerely,
